

BillDesk — User Guide and Help

Billing, orders, purchases, stock and accounts for a fruit & vegetable wholesale business

Every screenshot was taken from the real application using made-up demo data (fictional customers, items and amounts). Your screens show your own data. This guide is also the help inside BillDesk: press F9 on any screen, or open **Help** in the menu bar, and type your question.**

Results for "how do I return goods"

8 topics found. The best match is first.

1. Return goods (credit note)

Bill history and returns > Bill History

A void invoice cannot have goods returned.

Quick steps:

1. In [Bill History](#) select the invoice they were bought on.
2. Press **Return Goods**.
3. Type the **Return qty** for each item. Tick **Spoiled?** if the goods are rotten and cannot be sold again.
4. Write a **reason** (optional) and, for a walk-in customer, choose how you refund (Cash, UPI, Bank).

2. Return goods to a supplier (debit note)

Stock and purchases > Procurement

Press → **Return Goods to Supplier**.

Quick steps:

1. **Procurement** → **Vendor Purchase Bills**, select the bill the goods came on.
2. Press → **Return Goods to Supplier**.
3. Type the quantity of each item, the reason, and press **Save return**. You can print the **debit note**.

3. Cancel a return

Bill history and returns > Bill History, Procurement

Answers: I **returned goods by mistake**.

A return entered by mistake can be cancelled.

Quick steps:

1. **Bill History** → **Credit Notes**, select the return.
2. Press **Cancel this return** and confirm.

Searching the help

On paper, in Word, in the PDF or in the notebook, use **Ctrl+F** and the same words. The notebook edition also has a **ask("...")** search (see the last cell).

Find it by what you want to do

I want to...	Go to
make a bill for a customer	Making a bill
sell to a walk-in customer for cash	Choosing the customer
change the bill date	The bill date and the calendar
add items quickly with the keyboard	Entering items
put a bill on hold and serve someone else	Park a bill and recall it
take payment or leave it on credit	Taking payment
print or save an invoice or delivery challan	Print and PDF
find an old bill	Bill History
see who has not paid	Filtering bills
cancel a bill I made by mistake	Void a bill
take goods back from a customer	Return goods (credit note)
cancel a return I entered by mistake	Cancel a return
print a credit note	Credit notes
record a customer's order	New customer order
read an order from a photo or WhatsApp image	Smart Importer
turn an order into a bill	Convert an order
know how much to buy for tomorrow	Order matrix
add a customer, item or supplier	Customers, Items, Suppliers
give a customer a fixed rate	Fixed contract rates

I want to...	Go to
correct stock after counting	Stock adjustment
write off rotten produce	Waste and spoilage
enter a supplier's bill	Vendor bills
send goods back to a supplier	Return to supplier (debit note)
record money received from a customer	Customer receipts

1.2 What BillDesk does

Screen: All

BillDesk is a desktop program for the billing counter and the back office of a wholesale fruit and vegetable business. One program, one database, one set of numbers.

You do this...	...and BillDesk automatically
Make a bill	reduces stock, adds to the customer's balance, records the sale and its cost in the accounts
Receive payment	reduces the customer's balance, records cash or bank in the accounts, closes the bill
Enter a supplier bill	adds what you owe the supplier (and TDS if it applies)
Return goods	credits the customer, puts good stock back, reverses the sale in the accounts
Void a bill	puts the stock back, reverses the balance and the accounts
Take a customer order	lists it in the order matrix so you know how much to buy, and turns it into a bill with one click

GST is not used (fresh fruit and vegetables are exempt), so there is no tax set-up. A GSTIN can still be stored for a customer or supplier if you want it on file.

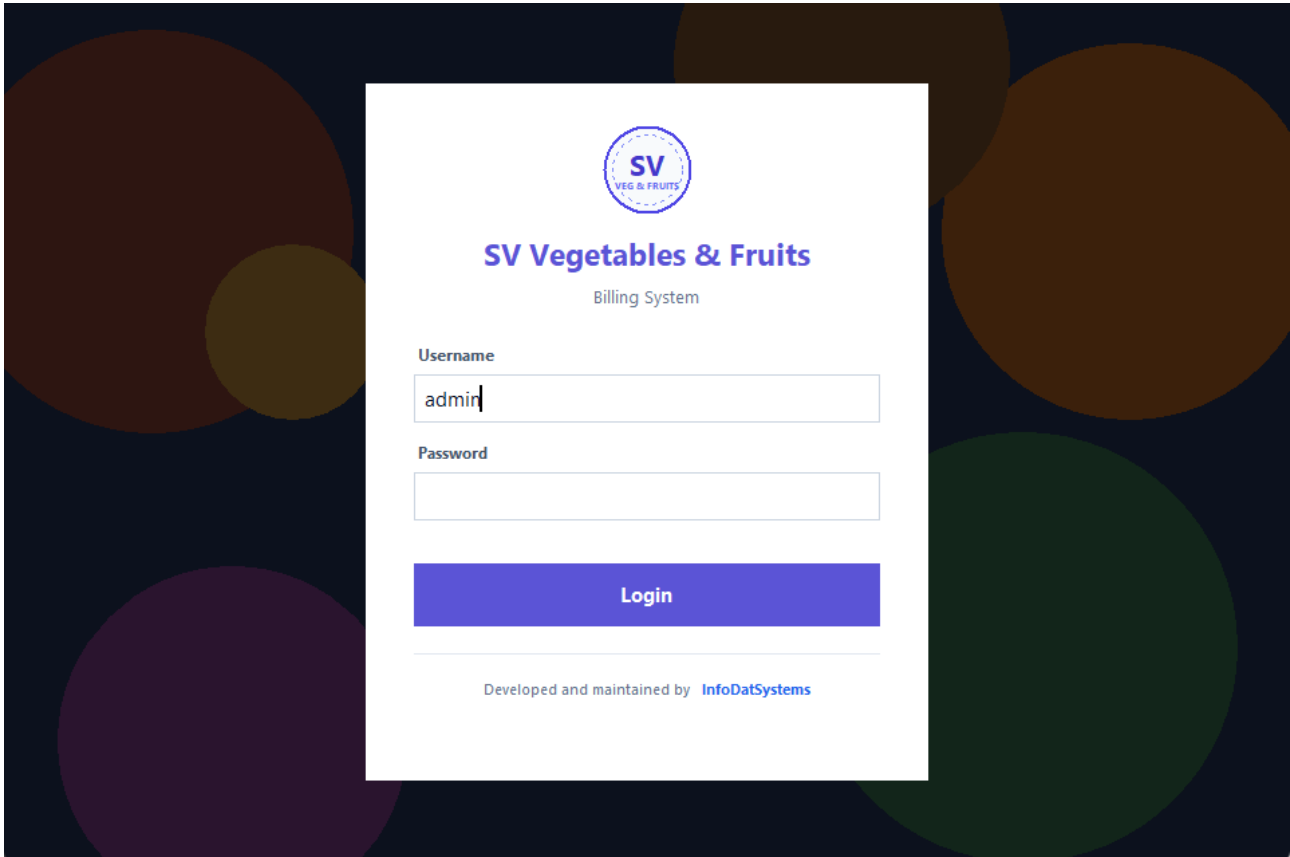

Who sees what. Menus depend on your role. Cashiers normally see Billing, Orders and Bill History; managers also see Masters, Reports and Accounts; administrators see everything including Settings. If a menu is missing, your role does not include it: ask the administrator ([Users and roles](#)).

See also: [The dashboard](#) · [Signing in](#)

1.3 Signing in

Screen: Login

1. Double-click **BillDesk** on the desktop or in the Start menu. The first start takes a few seconds because BillDesk starts its own database.
2. Type your **username** and **password**.
3. Press **Enter** or click **Login**.

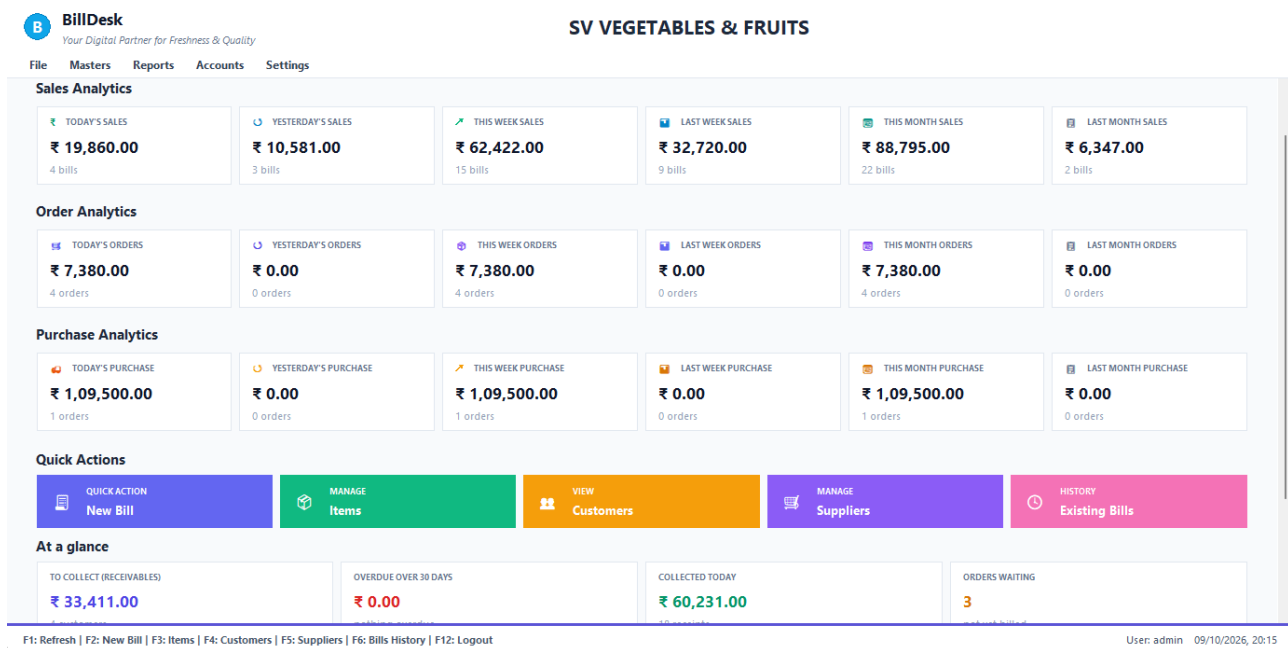

Sign-in screen

- **First time ever:** the installer creates one administrator named **admin** with a **random password shown once**. Write it down, then create the other users in [Users and roles](#).
- **Forgot the administrator password?** Ask your IT person to run `python scripts\reset_password.py --user admin`.
- Only **one BillDesk window** can be open on a computer; if you start it twice, the second copy tells you.
- To sign out press **F12** (you are asked to confirm).

See also: [Users and roles](#) · [Finding your way around](#) · [Frequently asked questions](#)

1.4 Finding your way around

Screen: Main window

Menu bar

- **Top:** your company name and the menu bar.
- **Middle:** the screen you are working on.
- **Bottom strip:** the keys that work on this screen, who is signed in and the date and time.

Menu	Contains
File	New Bill (F2), New Customer Order, Ordering System (Ctrl+O), Purchase system (Ctrl+P), Logout (F12), Exit
Masters	Item Master (F10), Customer Master (F4), Supplier Master (F5), Waste Management
Reports	Bills History (F6), Daybook, Item-wise Sales, Customer-wise Sales, Bills Consolidated Report, Order Consolidation, Fixed Rates Report, Profit & Loss, Balance Sheet, Dashboard (F1)
Accounts	Accounting Dashboard (Ctrl+D), Trial Balance, Profit & Loss, Balance Sheet, BRS, Handover & Settlement, Integrity Check, Accounts Receivables, Accounts Payables
Settings	User Management, Company Settings, Database Settings, System Audit Logs
Help	Help & User Guide (F9), Keyboard shortcuts, About

Press **F9** on any screen for help about that screen. All shortcut keys are listed in [Keyboard shortcuts](#).

See also: [Keyboard shortcuts](#) · [The dashboard](#) · [How to use this guide](#)

1.5 The dashboard

Screen: *Dashboard*

The dashboard is the first screen after you sign in. Press **F1** from anywhere to come back to it (the figures are re-read each time).

A bill with six items

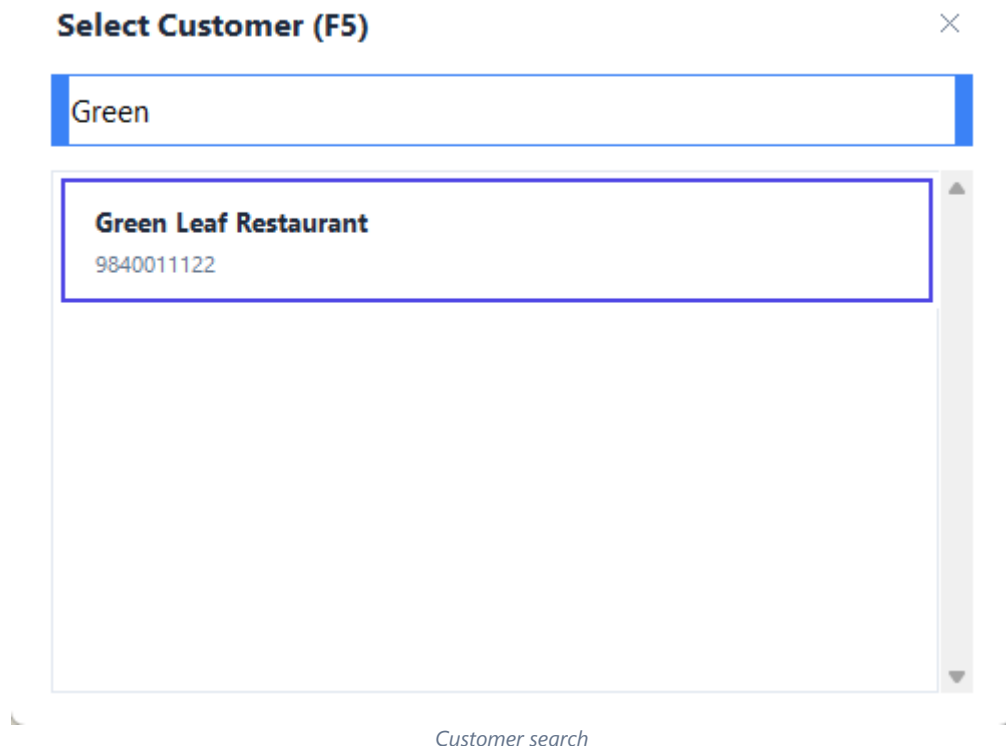

See also: [Choosing the customer](#) · [The bill date and the calendar](#) · [Entering items](#) · [Taking payment](#)

2.2 Choosing the customer

Screen: New Bill

Press **F5** (or click the customer box).

1. Type part of the customer's name or phone number: the list narrows as you type.
2. Press ↓ or ↑ to move, **Enter** to choose. (Esc closes the list; a click also chooses.)
3. Choose **Cash Customer** for a walk-in sale.

- The customer's address, their "bill to" name and their company are filled in for you, and any **fixed contract rates** for that customer are used.
- The same dialog is used on [New customer order](#), so it works the same everywhere. Orders need a real customer (no Cash option there).
- A customer who is not in the list must be added first in the [Customer Master](#).

See also: [Making a bill](#) · [The bill date and the calendar](#) · [Customers](#)

2.3 The bill date and the calendar

Screen: New Bill

Right after you choose the customer the cursor goes to **Date** and a **calendar drops down** under it.

1. Click a day, or use the arrow keys and press **Enter**. **Today** jumps to today.
2. Or type a date (**13/10/2026**, **13-10-26**) and press **Enter**.
3. The cursor moves on to the first empty row of the grid.

Billing Company: SV Vegetables & Fruits

Calendar under the date box

- The date you choose **is the date of the bill** and its invoice number follows that day (20261005-0003 for 5 October).
- A bill cannot be dated in the future.
- More about date boxes everywhere in the program: [Dates and the calendar](#).

See also: [Dates and the calendar](#) · [Entering items](#)

2.4 Entering items

Screen: New Bill

Work row by row with the keyboard: **Code** → **Qty** → **Unit** → **Rate** → **next row**, pressing **Enter** each time.

- Type the item **code** (for example **111**) or a part of its **name** (**tom**), press **Enter**. The description, unit and rate appear and the cursor goes to **Qty** (1 is filled in).
- Type the **quantity**, press **Enter**. The cursor passes through **Unit** to **Rate**.
- Change the **rate** if you need to; press **Enter** to go to the next row.

Billing Company: SV Vegetables & Fruits Customer (F5): Green Leaf Restaurant Date: 09/10/2026 Inv No: New

User: admin 09/10/2026, 20:15

The hint line

- **The hint line** under the grid tells you the item, its stock ("No stock recorded" if stock is not tracked for it) and the rate and where it came from: *fixed rate for <customer> or item rate*.
- **Several items fit what you typed?** A list opens: ↑ / ↓ to move, **Enter** to choose, **Esc** to cancel. BillDesk never picks the first match for you.

2 items match 'be' - choose one (Enter), or Esc to cancel

106	Beans (Kg)
107	Beetroot (Kg)

Choose between items

- An item typed in a lower row **moves up** to the first empty row, so there are never gaps.
- The red ✖ clears a row and the rows below move up.
- You can sell more than the stock shows; BillDesk warns but does not stop you (your administrator can change this).
- Quantity and rate must be numbers; a bill cannot have a zero quantity or a negative rate.

See also: [The same item twice](#) · [Taking payment](#) · [Fixed contract rates](#)

2.5 The same item twice

Screen: New Bill

If you type an item that is already on the bill, BillDesk asks what to do.

Duplicate Item Detected

Item 'Tomato' (Code: 111) is already entered in Line #1 with Quantity: 25 Kg.

Would you like to Add this quantity to Line #1 or Ignore this line?

Quantity to Add to Line #1: Kg

 Add the QTY (Enter)

 Ignore (Delete Duplicate)

Duplicate item

- **Add the QTY (Enter)** adds the new quantity to the existing row.
- **Ignore (Delete Duplicate)** removes the new row.

See also: [Entering items](#)

2.6 Taking payment

Screen: New Bill

1. Press **F2** (save) or **F3** (save and print).
2. The amount received is filled in with the whole total. Change it if the customer pays part.
3. Choose the **payment method** and, for UPI or a cheque, the **reference**.
4. Press **Enter** or **Post Payment**.

Record Payment Receipt

Post Payment

Payment dialog

Box	Meaning
Outstanding / Unpaid bills	what this customer already owes before this bill
Amount Received	what the customer pays now; anything not paid stays on their account
Payment Date	shown for information: a counter payment is recorded on the bill's date
Payment Method	Cash, UPI, Cheque, NEFT/RTGS, or Credit/Due (nothing paid now)
Reference / UTR	UPI or cheque number (optional)

- You cannot receive more than the bill total.
- After posting, the sheet is cleared for the next bill. With **F3** the invoice opens for printing.
- Later payments are recorded as a [customer receipt](#).

2.7 Park a bill and recall it

Screen: New Bill

Serving two customers at once? Put one aside.

1. Press **F6** (or **Park**) with the items entered. The sheet clears.
2. Serve the next customer.

3. Press **F7** (or **Parked (n)**), click the parked bill to bring it back. If another bill is on the sheet you are asked before it is replaced.

Select Parked Bill to Recall

#1 Green Leaf Restaurant — Total: ₹4025.00

Parked 09/10/2026 20:15 by admin (6 items)

Parked bills

Parked bills are kept on disk: they survive closing BillDesk or a power cut.

See also: [Making a bill](#)

2.8 Print and PDF

Screen: New Bill, Bill History

After **F3**, or from [Bill History](#), the invoice opens in the **print preview**.

Bill details

It shows the customer, date, status, the items with quantity, rate and amount and the grand total, with buttons to preview or save the invoice and the challan.

See also: [Bill History](#) · [Print and PDF](#)

3.4 Void a bill

Screen: *Bill History*

A bill made by mistake is **voided**, not deleted, so the record and the invoice number stay.

1. Open [Bill History](#) and select the bill.

2. Press **Void Bill**.
3. Read what will happen and confirm.

Voiding: reverses the customer's balance, puts the stock back, reverses the crates and the accounts, and marks the bill **void**. Payments that had been allocated to it become the customer's **advance** (credit).

- A bill that has goods returned against it **cannot be voided**: [cancel the return](#) first.
- A voided bill cannot be voided twice.
- To take back only some goods, use [Return goods](#), not void.

See also: [Return goods \(credit note\)](#) · [Bill History](#)

3.5 Return goods (credit note)

Screen: Bill History

A customer brings goods back.

1. In [Bill History](#) select the invoice they were bought on.
2. Press **Return Goods**.
3. Type the **Return qty** for each item. Tick **Spoiled?** if the goods are rotten and cannot be sold again.
4. Write a **reason** (optional) and, for a walk-in customer, choose how you refund (Cash, UPI, Bank).
5. Press **Save return**. You are offered the **credit note** to print.

Return against 20261007-0002

Sunrise Hostel Mess

Item	Billed	Returned	Return qty	Spoiled?	Credit
Banana Green	2 kg	0	3	☐	120.00
Beans	10 kg	0	1	☒	60.00
Onion	20 kg	0		☐	
Bajji Chilli	10 kg	0		☐	
Apple	8 kg	0		☐	

Reason

Quality not as ordered

The credit reduces what the customer still owes on this invoice; any excess stays as credit on their account.

Credit total: ₹ 180.00

Cancel

Save return

Return goods

What happens:

	Good goods	Spoiled goods
Customer is credited at the rate billed	yes	yes
Goes back into stock	yes, at the cost it was sold at	no
Sales are reduced in the accounts	yes	yes

- The credit first reduces **what the customer still owes on that invoice**; anything more stays as **credit on their account** (shown as Cr in the customer list).
- You cannot return more than was billed minus what was already returned.
- A void invoice cannot have goods returned.

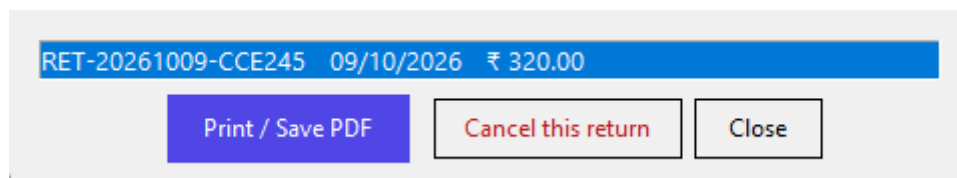

- A walk-in customer is refunded from the cash drawer or bank.

See also: [Credit notes](#) · [Cancel a return](#) · [Void a bill](#) · [Customer statement](#)

3.6 Credit notes

Screen: *Bill History*

Bill History → **Credit Notes** lists the returns made on the selected invoice, each with its number, date and amount.

Credit notes for an invoice

Select one and press **Print / Save PDF**. The credit note shows each item, whether it was good or spoiled, the total in words and how the credit was applied.

SV Vegetables & Fruits

For SV Vegetables & Fruits Authorized Signatory						

Credit note

See also: [Return goods \(credit note\)](#) · [Cancel a return](#)

3.7 Cancel a return

Screen: Bill History, Procurement

A return entered by mistake can be cancelled.

1. **Bill History** → **Credit Notes**, select the return.
2. Press **Cancel this return** and confirm.

BillDesk puts back the customer's balance, the invoice's balance due, the stock and the accounts exactly as they were; the credit note stays on file, marked **cancelled**, and no longer counts anywhere. The whole quantity can be returned again afterwards.

- A return can be cancelled once only.
- Returns made by the older program cannot be cancelled here.
- A supplier return (debit note) is cancelled from **Procurement** → **Returns to Suppliers** → **Cancel Debit Note** ([purchase return](#)).

Delivery date calendar

- The **order date** cannot be in the future.
- The **delivery date** cannot be before the order date (those days are greyed out in the calendar). It starts as tomorrow.
- Both are required; an unusable date turns red and the form tells you which one when you save.

See also: [New customer order](#) · [Dates and the calendar](#)

4.4 Smart Importer (photo, scan or text)

Screen: New Order

Customers send orders as photos or messages. **F8** on the order form reads them for you.

- Press **F8**.
- Press **Upload Image...** and choose the photo or scan (PNG, JPG, BMP, TIFF, WebP).
- Wait a few seconds: the picture shows on the left and what was read on the right.
- Check the **customer**, the **date** and every row. A row marked ? (**choose item**) could not be matched: **double-click** it to pick the item, correct the quantity or unit, or remove the line.
- Press **Import to Grid**. The items go into the order; check the quantities, then save with **F3**.

09.10.26
Green Leaf
வெங்காயம் - 20
உரளக்கிழங்கு - 15
பீன்ஸ் - 10
பீட்ரூட் - 5
Apple - 8

Data extracted with warnings

• 2 line(s) could not be matched to an item. Check them before importing.

CUSTOMER:

Green Leaf Restaurant

DATE:

09/10/2026

Item (English)	Qty	Unit	Read as
? (choose item)	20	Kg	GIGI AIG ITWILO
Potato	15	Kg	உரளக்கிழங்கு
Beans	10	Kg	பீன்ஸ்
? (choose item)	5	Kg	பீட்ரூட்
Apple	8	Kg	Apple

Double-click a row to correct the item, quantity or unit.

Paste text instead

Upload Another

Import to Grid

Smart Importer

- BillDesk reads **English and Tamil** (and Hindi, Telugu, Kannada, Malayalam) with the built-in Tesseract reader, converts Tamil numerals, **translates the item names to English** and matches them to your Item Master.
- The date and the customer at the top of the note are picked up too.
- **Printed or typed** orders read well. **Handwriting is hard for this kind of reader**: if nothing can be read the window says so instead of guessing. Use a straight, bright photo, or type the lines with **Paste text instead**.
- The same item twice in one order is added together.

See also: [Importing order text](#) · [New customer order](#)

4.5 Importing order text

Screen: New Order

For orders that arrive as text (WhatsApp, SMS): in the Smart Importer choose **Paste text instead**.

Smart Order Text Importer

Paste raw WhatsApp / message text below (e.g. 'Apple 25kg', '102 50kg'):

```
111 30kg  
112 50kg  
beans 12 kg  
beetroot 8  
105 20kg
```

 Load File...

Cancel

Parse & Populate

Text importer

1. Paste the message, one item per line: **111 30kg**, **beans 12 kg**, **105 20**.
2. Press **Parse & Populate** (or **Load File...** for a **.txt** / **.csv**).

Item codes and names both work, in either order with the quantity. Lines that cannot be matched to an item are **not** guessed: they are listed so you can add them by hand.

See also: [Smart Importer \(photo, scan or text\)](#) · [New customer order](#)

4.6 Convert an order to a bill

Screen: Orders

1. On **Orders**, select the order.
2. Press **Convert to Sales Bill**.

The bill is made with the order's items and rates and the order becomes **billed**, linked to the invoice (shown in **Linked Docs**). A billed order cannot be converted again. **Convert to Purchase Bill** does the same for buying the goods from a supplier.

See also: [Orders and shipments](#) · [Making a bill](#)

4.7 Order matrix: how much to buy

Screen: Order Matrix

Reports → **Order Consolidation** adds up all pending orders: one row per item, one column per customer, then the **total order**, **current stock** and **to purchase**.

Add customer

- **Customer Name** (ship-to) and **DC Company Name** (the "bill to") can differ: goods go to one place, the invoice to another company. Invoices and the consolidated report use both.
- Phone: 7 to 15 digits, up to three numbers separated by commas. Email and GSTIN are optional but checked when given (GSTIN is 15 letters or digits). Names must be unique.
- **Credit limit** and **Opening balance** must be numbers. A customer's balance is changed only by bills, receipts and returns, never by editing the form.

Goods receipts

A vendor bill linked to a PO and a GRN is checked three ways (rates against the PO, quantities against what was received) and mismatches are flagged.

See also: [Enter a vendor bill](#) · [Inventory: live stock](#)

6.8 Return goods to a supplier (debit note)

Screen: Procurement

1. **Procurement** → **Vendor Purchase Bills**, select the bill the goods came on.
2. Press ☐ **Return Goods to Supplier**.
3. Type the quantity of each item, the reason, and press **Save return**. You can print the **debit note**.

Return to supplier against PUR-20261009195619-D93D

Fresh Farm Suppliers

Item	Billed	Returned	Return qty	Value
Apple	300 kg	10	10	1,300.00
Avarai	300 kg	0	0	
Bajji Chilli	250 kg	0	0	
Banana Green	300 kg	0	0	
Beans	250 kg	0	0	
Beetroot	300 kg	0	0	
Tomato	400 kg	0	0	
Onion	500 kg	0	0	

Reason

The value (less any TDS that was deducted) reduces what you still owe on this bill; any excess stays as credit with the supplier.

Return to supplier

- The value is at the bill's rate. If **TDS** was deducted, the same share comes back, so what you owe falls by the **net** amount.
- It reduces what you still owe on that bill first; any excess is **credit with the supplier**.
- Stock goes down only if the goods had been received into stock (the bill has a goods receipt).
- The **Returns to Suppliers** tab lists them; **Print Debit Note** and **Cancel Debit Note** are there.

Customer statement

- Lists invoices (billed), receipts, returns and adjustments with a **running balance**, ending on the customer's balance.
- **From / To** (calendar boxes) show one period; the earlier balance is brought forward.
- **Export CSV** saves it for Excel.
- "Adjustment" appears when the customer paid something that was never recorded here.

Balance sheet

- **Trial balance:** every account's debits and credits; the totals must be equal.
- **Profit and loss:** sales (net of returns), cost of goods sold, waste and expenses, giving the profit.
- **Balance sheet:** what you own, owe and the owner's capital.

See also: [General ledger and manual journal](#) · [Integrity check](#)

7.10 Integrity check

Screen: Integrity Check

Accounts → **Integrity Check** → **Run Check** reads your data (it changes nothing) and tests that the books are consistent.

Integrity Check

Do bills, payments, customer balances, stock and the ledger agree with each other? (read-only)

Run Check

Save Report...

13 ok 0 warnings 0 failures 0 notes (checked 09/10/2026 20:16)

Status	Check	Result
OK	Every journal entry balances	82 entries, trial balance balanced (Dr 232,849.50 / Cr 232,849.50)
OK	Balance sheet balances (Assets = Liabilities + Equity)	Assets 138,076.89; Liabilities 68,200.00 + Equity 69,876.89
OK	Receivables ledger equals the sum of customer balances	Both 35,436.00
OK	Customer balance = open bills - unallocated payments	6 customers agree
OK	Bill totals equal their lines (qty x rate, charges)	26 bills consistent
OK	Bill status agrees with its balance due	all statuses consistent
OK	Payments are fully backed by existing invoices	21 payments consistent
OK	Invoice numbers are unique and in sequence	26 numbers unique
OK	Every transaction is posted to the ledger	all transactions are journalled
OK	Voided bills are reversed in the ledger	all voided bills reversed
OK	Bills and orders point at records that exist	all references resolve
OK	No item has negative stock	8 items with stock, none negative
OK	Supplier balance = open purchase bills	suppliers agree

Details of the selected check

Select a check above to see which records are affected.

Integrity check

Each line is **OK**, **Info**, **Warning** or **Fail**: journals balance, receivables equal customer balances, bills add up, statuses agree with balances, invoice numbers are unique, stock is not negative, and more. Open a line to see exactly which records. **Save Report...** keeps a copy. Run it before closing the month and after restoring a backup.

Chapter 9. Administration

9.1 Cash drawer

Screen: Handover & Settlement

Accounts → Handover & Settlement.

The screenshot shows the BillDesk System Administration interface. At the top, there's a header with the BillDesk logo and tagline 'Your Digital Partner for Freshness & Quality', and the company name 'SV VEGETABLES & FRUITS'. Below the header is a navigation bar with links: File, Masters, Reports, Accounts, and Settings. The main content area is titled 'System Administration' with a subtitle 'Cashier drawer sessions, users and access'. There are two tabs: 'Cashier Drawer & Z-Report' (selected) and 'Users & Access'. Under the 'Cashier Drawer & Z-Report' tab, there's a section titled 'Active Drawer Session'. It displays the status 'SESSION OPEN' in green. Below the status, it shows session details: 'Session ID: SES-20261009-37F594 | Opened: 09/10/2026', 'Opening Drawer Cash: ₹ 2,000.00', and 'Current Expected Cash (Drawer + Sales + Receipts): ₹ 4,000.00'. At the bottom of this section are three buttons: 'Open Drawer Session', 'Close Session & Generate Z-Report', and 'Refresh Status'. The footer of the interface shows 'F1: Dashboard | F2: New Bill | F5: Refresh | F12: Logout' on the left and 'User: admin 09/10/2026, 20:16' on the right.

Cash drawer

1. At the start of the day press **Open Drawer Session**, type the **opening float** and press **Start Session**.

The screenshot shows a screen titled 'Open the drawer'. It has a light gray background. At the top, it says 'Opening Float / Cash in Drawer (₹):'. Below this is a white input field containing the text '1000.0'. At the bottom, there is a button labeled 'Start Session'.

Open the drawer

1. Work as usual: cash receipts are added to the expected cash.
2. At the end press **Close Drawer & Generate Report**, type the cash you **counted** and a note for any difference.
3. BillDesk shows the Z-report: expected, counted and **short / excess**.

Amounts must be numbers (0 or more). You can have only one open session.

 GK Vegetables & Fruits Company0002	9876543210 info@gkveg.com	33ABCDE1234F1Z5	No. E-2 Periyar Vegetable Market, Koyambedu, ...	edit trash

F1: Dashboard | F2: New Bill | F5: Refresh | F12: Logout

User: admin 09/10/2026, 20:16

Company configuration

- **+ Add Company** and the  **edit** icon open the form; the trash icon deletes (the default company and the last company cannot be deleted).
- **Search**, **Export** and **Import** (a CSV with a **name** column) manage many companies.

BillDesk — User Guide and Help

Page 70

Edit Company

Company name *	SV Vegetables & Fruits
Address	No. E-2 Periyar Vegetable Market, Koyambedu, Chennai - 600092.
Phone number(s)	9876543210
Email	info@svveg.com
GSTIN (optional)	33ABCDE1234F1Z5
Terms & conditions (on invoice)	1. Goods once sold will not be taken back. 2. Interest @ 24% p.a. will be charged if bill is not paid within due date.
Signatory title	Authorized Signatory
Logo	 Choose... Remove
☒ Use as the default company (used on bills that name no company)	

Cancel

Save

Edit company

Name, address, phones, email, GSTIN (optional), terms and conditions, signatory title, a **logo** (any picture; it is shrunk) and **use as default company**. Changes appear on the next invoice you print.

9.4 Backup and database

Screen: Database Settings

Settings → **Database Settings** (titled **Backup & Database**).

Backup & Database

Keep a safe copy of your data

Backups

No backup has been taken yet.

[Back Up Now](#)

[Open Backup Folder](#)

[Open Log File](#)

A backup is taken automatically once a day while BillDesk is used, and each one is checked after it is written.
To restore: `python scripts/restore_backup.py <backup.zip> --target-db <new name>`

Where your data is kept

Normally this is the database on this computer. Change it only if you were asked to.

Database address

Database name

[Test Connection](#)

This computer: `mongodb://127.0.0.1:27018` Online (Atlas): `mongodb+srv://user:password@cluster.mongodb.net/`

Backup and database

- A backup is taken **automatically once a day** while BillDesk is used, and each one is **checked after it is written**.
- **Back Up Now** makes one immediately; **Open Backup Folder** shows the files; **Open Log File** helps your IT person.
- To restore, your IT person runs `python scripts\restore_backup.py <backup.zip> --target-db <new name>`; then run the [Integrity check](#).
- *Where your data is kept* normally needs no change. **Test Connection** checks the database address.
- Copy the backup folder to a pen drive or cloud drive regularly: a backup on the same computer does not help if the computer is lost.

Chapter 10. Reference

10.1 Keyboard shortcuts

Screen: All

The strip at the bottom of each screen lists the keys that work there.

Key	Anywhere	On New Bill	On New Order
F1	Dashboard (search on Bill History)		
F2	New Bill	save and take payment	save the order
F3	Item Master	save and print	save the order
F4	Customer Master		
F5	Supplier Master (from Dashboard); refresh	choose customer	choose customer
F6	Bills History	park the bill	
F7		parked bills	
F8			Smart Importer
F9	Help for this screen		
F10	Item Master		save and print
F11	Customer Master		
F12	Log out		
Esc	close a dialog	close a dialog	close the form
Ctrl+O	Orders		
Ctrl+P	Procurement		
Ctrl+D	Accounting Dashboard		

In lists and dialogs: ↑ / ↓ move, **Enter** chooses, **Esc** closes. In the grids: **Enter** moves to the next box. In any date box: ↓ opens the calendar.

See also: [Finding your way around](#) · [Entering items](#)

10.2 Dates and the calendar

Screen: All

Every date box in BillDesk works the same way:

- Click it (or move to it with the keyboard): a **calendar** drops down. **Click** a day, or use the **arrow keys** (Page Up / Down change month) and **Enter**; **Today** jumps to today.
- You can also **type** a date: **13/10/2026**, **13-10-26**, **2026-10-13**. Press **Enter** to accept it.
- Text turns **red** when the date cannot be used; the form tells you why when you save.
- Days that are not allowed are **greyed** in the calendar.

Where	Rule
Bill date	required; not in the future
Order date	required; not in the future
Delivery date	required; not before the order date
Fixed rate start / end	required; end not before start
Report and statement From / To	optional; <i>To</i> not before <i>From</i>
Consolidated report From / To	required; <i>To</i> not before <i>From</i>

Where	Rule
Filters (Bill History, Orders)	optional; part of a date (09/2026) is fine

See also: [The bill date and the calendar](#) · [Order and delivery dates](#) · [Dates in reports](#)

10.3 What each form accepts

Screen: All forms

BillDesk checks what you type and says what is wrong instead of saving bad data.

Field	Rule
Quantity, rate, amount	a real number; quantity above zero; rate zero or more; not absurdly large
Item name	required, up to 80 characters, not already used
Item code	no spaces, up to 20 characters, unique
Customer / supplier name	required, up to 80 characters, not already used
Phone	7–15 digits; up to three numbers separated by comma or slash
Email	like name@shop.com
GSTIN	optional; 15 letters/digits
Credit limit, opening balance	a number (credit limit 0 or more)
TDS rate	0 to 100
Username	3–30 letters, digits, . - _
Password	at least 6 characters, at most 72 bytes, not the username
Payment mode	Cash, UPI, Cheque, NEFT, RTGS, NEFT/RTGS, Bank, Card (and Credit/Due on a bill)
Vendor invoice number	required, up to 40 characters, once per supplier
Bank account	6–20 digits; IFSC like SBIN0001234 ; type Current, Savings or OD
Cash drawer amounts	0 or more
Crates	whole numbers, 0 or more
Journal entry	reference required; two different accounts; debit equals credit

10.4 Messages and what to do

Screen: All

Find the words you see on the screen in the first column; the next columns say why it happened and what to do.

What you see	Why	What to do
"Choose a customer from the customer master (F5)"	an order needs a real customer	press F5 , choose one; add the customer first if missing
"The bill date cannot be in the future"	the date box holds a later day	pick today or an earlier day
"... is not a valid date. Use DD/MM/YYYY"	text in a date box can't be read	pick from the calendar
"The To date cannot be before ..."	To is earlier than From	change one of them
"Amount received (...) is more than the bill total"	more entered than the bill	type the bill amount or less

What you see	Why	What to do
"Item ... not found" / "No item matches"	wrong code	check the code in the Item Master
"... must be a number"	letters or symbols in a number box	type digits only (decimals allowed)
"An item / customer named ... already exists"	the name is taken	use another name, or edit the existing one
"Vendor invoice ... is already recorded as PUR-..."	the same supplier invoice was entered before	do not enter it again
"Payment amount ... exceeds purchase balance due"	paying a supplier more than owed	pay the balance due or less
"Waste quantity ... exceeds stock on hand"	more than the tracked stock	check the quantity
"Invoice ... has goods returned against it, so it cannot be voided"	a return exists	cancel the return first, then void
"only n can still be returned"	more than billed minus earlier returns	reduce the return quantity
"Return ... was made by the older BillDesk and cannot be cancelled here"	old returns lack detail	leave it; it is already reflected in the balance
"The entry does not balance"	journal debit ≠ credit	make the two amounts equal
"You already have an open cashier session"	a drawer is open	close it first
"Access Denied"	your role does not include that screen	ask the administrator
"Tesseract OCR engine is not installed"	the image reader is missing	use Paste text instead , or ask IT to reinstall
"The text in this image could not be read reliably"	handwriting or a blurry photo	take a straighter, brighter photo or type the lines
Integrity check shows Warning	an older-data difference	open the line; ask your accountant if unsure
Cannot start: database error	the database did not start	restart the computer, then BillDesk; call IT if it repeats

See also: [What each form accepts](#) · [Frequently asked questions](#) · [Backup and database](#)

10.5 Frequently asked questions

Screen: All

Short answers to the questions people ask most; follow the link in the last column for the full steps.

Question	Answer	More
Can I change the date of a bill after saving?	No. Void the bill and make it again with the right date.	Void
How do I sell to someone who is not a customer?	Leave Cash as the customer and take the full payment.	Customer
Why did the bill number have a different date?	The invoice number follows the bill date you chose.	Bill date
A customer paid half. What now?	Enter the amount received; the rest stays on their account.	Payment
A customer paid later in cash. How do I record it?	Use Record Customer Receipt .	Receipt
How do I see what one customer owes, bill by bill?	Open the customer's Statement .	Statement
What is "Cr" next to a balance?	You hold the customer's money (advance or return credit).	Customers

Question	Answer	More
What is the difference between void and return?	Void cancels the whole bill; return takes back some goods and keeps the bill.	Return
I returned goods by mistake.	Cancel the return.	Cancel return
Does BillDesk handle GST?	No: fruit and vegetables are exempt, so no GST is calculated.	What it does
Can two people bill at once?	Yes on different computers using the same database; park a bill to serve two customers at one counter.	Park
How often should I back up?	BillDesk backs up daily; also copy the backup folder to another drive weekly.	Backup
Can it read my customer's handwritten list?	Not reliably. Printed or typed lists work; otherwise type or paste.	Smart Importer
Stock shows 0 but I can still sell. Is that wrong?	No. Stock only tracks what you entered through purchases or adjustments.	Inventory
I forgot my password.	Ask the administrator; they reset it.	Signing in
Where do I change my shop name and address on invoices?	Settings → Company Settings.	Company

10.6 Glossary

Screen: All

The words used in BillDesk and in this guide, in plain language.

Word	Meaning
Bill / Invoice	the document you give the customer for goods sold
Challan (DC)	the same bill without prices, for delivery
Void	cancel a whole bill, keeping its record
Credit note	document for goods a customer returned (their balance goes down)
Debit note	document for goods you send back to a supplier
Dr / Cr	Dr: the customer owes you; Cr: you hold their money
Advance	money received before a bill or more than was owed
Receivables	money customers owe you
Payables	money you owe suppliers
PO / GRN	purchase order / goods receipt note (what actually arrived)
TDS	tax deducted from a supplier's payment
FIFO	oldest bill settled first
BRS	bank reconciliation statement
Trial balance	list of all accounts; debits must equal credits
Float	cash put in the drawer at the start of the day
Legacy bill	a bill made by the older program (no per-bill payment record)
Parked bill	a bill put on hold

10.7 About this guide

Screen: Help

This guide is written once in `Docs/BillDesk_Native_User_Guide.md` and turned into the Word, PDF and Jupyter notebook editions and the in-program Help by `python scripts/build_user_guide.py`. The screenshots come from `python scripts/user_guide/capture_screenshots.py` running on a demo database (see `scripts/user_guide/README.md`), so they can be redone whenever a screen changes.
